Information Structure and Agreement Sep 05 2021 This collection consists of thirteen contributions focusing on the latest trends of information structure and agreement, couched in the most current developments of Minimalism, Cartography, and Optimality. Some chapters focus on the syntax of information structure in relation with the position occupied by different constituents in the CP domain and their interpretation such as the distinction between contrastive and corrective focus; the inclusion of given information in focus; the interplay of information structure and binding; the relative position of complementisers; and discourse-based constituents in the left periphery. Information structure is also analysed with regards to prominence phenomena at word level. Other chapters deal with the notion of agreement and its role in the syntax of specific constructions such as applicatives, correlatives, or different types of CP like relatives or embedded interrogatives. This selection of papers was originally presented at the 21st Colloquium on Generative Grammar, held at the University of Seville in April 2011.

Verb Movement Jan 09 2022 Work on the movement of phrasal categories has been a central element of syntactic theorising almost since the earliest work on generative grammar. However, work on the movement of lexical elements, heads, has flourished only in recent years, stimulated originally by Chomsky's Empty Category Principle, and later by the work of Travis, Baker and Pollock. Parallel to these theoretical concerns, much attention has been focused on the description of verb-second languages and on the movement operations which place the verb in its 'second' position. This volume represents the latest work in an important field, from some of its leading researchers, and puts forward many ideas about relevant principles and parameters of Universal Grammar. It will have a significant impact on its field.

Other People's English: Code-Meshing, Code-Switching, and African American Literacy Nov 19 2022 This book presents an empirically grounded argument for a new approach of teaching writing to diverse students in the English language arts classroom. Responding to advocates of the "code-switching" approach, four uniquely qualified authors make the case for "code-meshing"--allowing students to use standard English, African American English, and other Englishes in formal academic writing and classroom discussions. This practical resource translates theory into a concrete roadmap for pre-and in-service teachers who wish to use code-meshing in the classroom to extend students' abilities as writers and thinkers and to foster inclusiveness and creativity. The text provides activities and examples from middle and high schools as well as college and addresses the question of how to advocate for code-meshing with skeptical administrators, parents, and students.

Between Languages and Cultures Dec 20 2022 Gabrielle Roy is one of the best-known figures of Québec literature, yet she spent much of the first thirty years of her life studying, working, and living in English. For Roy, as a member of Manitoba's francophone minority, bilingualism was a necessary strategy for survival and success. How did this bilingual and bicultural background help shape her work as a writer in French? The implications of her linguistic and cultural identity are explored in chapters looking at education, language, translation, and the representation of Canada's other minorities, from the immigrants in Western Canada to the Inuit of Ungava. What emerges is a new reading of Roy's work. Drawing on archival material, postcolonial theory, and translation studies, *Between Languages and Cultures* explores the traces and effects of Roy's intimate knowledge of English language and culture, challenging and augmenting the established view that her work is distinctly French-Canadian or Québécois.

Stretched Verb Constructions in English Dec 28 2020 Constructions such as 'make an accusation against', or 'give one's approval for' can be seen as 'stretched' versions of simple verbs, such as 'accuse' or 'approve of'. What is the precise linguistic nature of stretched verbs, and how many basic types are there? What kinds of grammatical connections are involved, and what lexical limits are there on these constructions? What is their precise semantic value? These are some of the questions that this book sets out to answer in its investigation of stretched verb constructions.

Religious Faith and Teacher Knowledge in English Language Teaching Feb 27 2021 The field of TESOL (Teaching English to Speakers of Other Languages) stands at an active crossroads – issues of language, culture, learning, identity, morality, and spirituality mix daily in classrooms around the world. What roles might teachers' personal religious beliefs play in their professional activities and contexts? Until recently, such questions had been largely excluded from academic conversations in TESOL. Yet the qualitative research at the core of this book, framed and presented within a teacher knowledge paradigm, demonstrates that personal faith and professional identities and practices can, and do, interact and interrelate in ways that are both meaningful and problematic. This study's Christian TESOL teacher participants, working overseas in Southeast Asia, perceived, explained, and interpreted a variety of such connections within their lived experience. As a result, the beliefs-practices nexus deserves to be further theorized, researched, and discussed. Religious beliefs and human spirituality, as foundational and

enduring aspects of human thought and culture, and thus of teaching and learning, deserve a place at the TESOL table.

Syntactic Argumentation and the Structure of English Jun 02 2021 Syntactic Argumentation and the Structure of English (SASE) presents the major theoretical developments in generative syntax and the empirical arguments motivating them. Beautifully and lucidly written, it is an invaluable resource for working linguists as well as a pedagogical tool of unequalled depth and breadth. The chief focus of the book is syntactic argumentation. Beginning with the fundamentals of generative syntax, it proceeds by a series of gradually unfolding arguments to analyses of some of the most sophisticated proposals. It includes a wide variety of problems that guide the reader in constructing arguments deciding between alternative analyses of syntactic constructions and alternative theoretical formulations. Someone who has worked through the problems and arguments in this book will be able to apply the skills in argumentation it develops to novel issues in syntax. While teaching syntactic argumentation, SASE covers the major empirical results of generative syntax. Its contents include: 1) Transformations in single-clause sentences 2) Complementation and multi-clause transformations 3) Universal principles governing rule interaction: the cycle and strict cyclicity 4) Movement rules 5) Ross's constraints 6) Pronominal reference and anaphora SASE is an important book for several different audiences: 1) For students, it is an introduction to syntax that teaches argumentation as well as a wide range of empirical results in the field. 2) For linguists, it is a sourcebook of classical analyses and arguments, with some new arguments bearing on classical issues. 3) For scholars, teachers, and students in related fields, it is a comprehensive guide to the major empirical and theoretical developments in generative syntax. SASE contains enough material for a two-semester or three-quarter sequence in syntax. Because it assumes no previous background, it can be used as the main text in an introduction to syntax. Since it covers a wide range of material not available in other texts, it is also suitable for intermediate and advanced syntax courses and as a supplementary source in more specialized courses and courses in other disciplines. A storehouse of classical and original arguments, SASE will prove to be of lasting value to the teacher, the student, and researchers in both linguistics and related fields.

The Acquisition and Use of Yes-no Questions in English Feb 22 2023 This monograph offers a comprehensive account

of the L1-acquisition and use of yes-no questions in English from a usage-based, construction grammar perspective. On the basis of the BNC and a high-density, longitudinal CHILDES corpus, the book explores two issues which have largely been neglected in previous research: 1. the prevalence of non-canonical questions (such as elliptical and declarative questions) in adult-to-adult as well as child(-directed) speech and the L1-acquisition of these structures. 2. The discourse-functional properties of both canonical and non-canonical yes-no questions, especially with regard to their influence on the acquisition process.
