One of the most dynamic writers and one of the most respected scientists in the field of climate change offer the first concise guide to both the problems and the solutions of global warming. Guiding us past a blizzard of information and misinformation, Gabrielle Walker and Sir David King explain the science of warming, the most cutting-edge technological solutions from small to large, and the national and international politics that will affect our efforts. While there have been many other books about the problem of global warming, none has addressed what we can and should do about it so clearly and persuasively, with no spin, no agenda, and no exaggeration. Neither Walker nor King is an activist or politician, and theirs is not a generic green call to arms. Instead they propose specific ideas to fix a very specific problem. Most important, they offer hope: This is a serious issue, perhaps the most serious that humanity has ever faced. But we can still do something about it. And they'll show us how. In this moving graphic novel without words, one of the finest artists of the 20th century uses 230 intricately detailed woodcuts to tell a dramatic tale of the Great Depression. A young girl who longs to be an accomplished violinist and a boy who hopes to become a builder find their dreams shattered by desperate economic times. This work has been selected by scholars as being culturally

important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment. Documenting theatrical and stage events under the often dramatic lighting designed for the production provides a number of specific photographic challenges, and is unlike most every other branch of photography. Theatre & Stage Photography provides an overview of basic photography as it applies to "available-light" situations, and will move both basic and experienced photographers through the process of accurately capturing both the production process and the resultant performance. This volume presents epigraphic research using digital and computational tools, comparing the outcomes of both well-established and newer projects to consider the most innovative investigative trends. Papers consider open-access databases, SfM Photogrammetry and Digital Image Modelling applied to textual restoration, Linked Open Data, and more. One of the twentieth century's finest engravers, Lynd Ward created remarkable woodcuts that resonate in both the heart and the imagination. His dramatic images present complete, self-contained narratives in both of these wordless tales. Prelude to a Million Years unfolds against the backdrop of the Great Depression, portraying in thirty illustrations a sculptor's struggles in an industrial society. Song Without Words explores one woman's emotional journey through pregnancy and childbirth in a series of twenty-one images described by the author as "a kind of prose poem." Ward's memorable works have been honored with such prestigious awards as the Library of Congress Award, the National Academy of Design Print Award, the New York Times Best Illustrated Award, the Caldecott Medal, and the Regina Award. An introduction by woodcut historian David A. Beronä places these stories within the context of Ward's career and the graphic arts world of the 1930s. Covers cutting-edge techniques for small and large businesses alike. Author is an in-demand consultant with strong media connections. A guide to color management using Adobe Photoshop. Titles are: Fairest Lord Jesus * Come Christians / Brethren We Have Met * Jesus, I May Cross / Must Jesus Bear the Cross * Let All Things Now Living * Be Thou My Vision * When I Survey the Wondrous Cross * All Things Bright and Beautiful * O Sacred Head / Jesus, Priceless Treasure * Joyful, Joyful * Lord, Make Me an Instrument of Thy Peace.
