You Are What You Choose Jul
06 2021 The hidden patterns
behind the way we make
decisions Several recent books,
from Blink to Freakonomics to

Predictably Irrational, have examined how people make choices. But none explain why different people have such different styles of decision making—and why those styles seem consistent across many contexts. For instance, why is a gambler always a gambler, whether at work, on the highway, or in a voting booth? Scott de Marchi and James T. Hamilton present a new theory about how we decide, based on an extensive survey of more than thirty thousand subjects. They show that each of us possesses six core traits that shape every decision, from what to have for lunch to where to invest. We go with “the usual” way of deciding whenever there’s a trade-off between current and future happiness, when facing the risk of a bad outcome, or when a choice might hurt other people. We’re also consistent about how much information we want and how much we care about the opinions of others. Readers can determine their own decision-making profile with a test in the book. Once they

understand the six core traits, they’ll have a big advantage in their marketing campaigns, management strategies, investments, and many other contexts.

NATIONAL BESTSELLER •

The thrilling first book in the Girl with the Dragon Tattoo series featuring Lisbeth Salander: “Combine the chilly Swedish backdrop and moody psychodrama of a Bergman

movie with the grisly pyrotechnics of a serial-killer thriller, then add an angry punk heroine and a down-on-his-luck investigative journalist, and you have the ingredients of Stieg Larsson’s first novel” (The New York Times). • Also known as the Millennium series Harriet Vanger, a scion of one of Sweden’s wealthiest families disappeared over forty years ago. All these years later, her aged uncle continues to seek the truth. He hires Mikael Blomkvist, a crusading journalist recently trapped by a libel conviction, to investigate. He is aided by the pierced and tattooed punk prodigy Lisbeth Salander. Together they tap into a vein of unfathomable iniquity and astonishing corruption. Look for the latest book in the Girl with the Dragon Tattoo series, The Girl in the Eagle’s Talons, coming soon!

Lemon-Aid New and Used Cars and Trucks 2007-2017

Jun 05 2021 “Dr. Phil,” Canada’s best-known automotive expert, invites another driver to come aboard. After forty-six years and almost two million copies sold, Phil Edmonston is joined by a co-pilot for the Lemon-Aid Guide — George Iny, along with the editors of the Automobile Protection Association. The 2017 Lemon-Aid has everything: an encyclopedic lineup of the best and worst cars, trucks, and SUVs sold since 2007; secret warranties

and tips on the “art of complaining” to help you get your money back; and new-car buying tips that will save you tons of money by revealing the inflated cost of fancy and frivolous add-ons. Lemon-Aid is an essential guide for careful buyers and long-time gear-heads who don't know as much as they think.

Adoptive Management

Innovation Mar 14 2022 This book discusses adoptive management innovation, which has been successfully implemented in other areas. It proposes a theory on this field by considering the importance and popularity of adoptive management innovation in China and around the globe, and focusing on its nature. It

also establishes a process framework through which adoptive management innovation occurs, explores how individual characteristics of individual managers affect their adoption decision, examines the effects of a firm's dynamic capability on each phase of adoptive innovation, and addresses how intangible management innovation supports the process of tangible product innovation to produce effects. By exploring the process, adoption decision, drivers and effects of adoptive management innovation, the book offers abundant applications for managerial practice.

No Code Required Nov 17

2019 No Code Required presents the various design, system architectures, research methodologies, and evaluation strategies that are used by end users programming on the Web. It also presents the tools that will allow users to participate in the creation of

their own Web. Comprised of seven parts, the book provides basic information about the field of end-user programming. Part 1 points out that the Firefox browser is one of the differentiating factors considered for end-user programming on the Web. Part 2 discusses the automation and customization of the Web. Part 3 covers the different approaches to proposing a specialized platform for creating a new Web browser. Part 4 discusses three systems that focus on the customized tools that will be used by the end users in exploring large amounts of data on the Web. Part 5 explains the role of natural language in the end-user programming systems. Part 6 provides an overview of the assumptions on the accessibility of the Web site owners of the Web content. Lastly, Part 7 offers the idea of the Web-active end user, an individual who is seeking new technologies. The first book since Web 2.0 that covers the latest research, development, and systems emerging from

HCI research labs on end user programming tools Featuring contributions from the creators of Adobe's Zoetrope and Intel's Mash Maker, discussing test results, implementation, feedback, and ways forward in this booming area
