Post Corona May 04 2021 New York Times bestseller! "Few are better positioned to illuminate the vagaries of this transformation than Galloway, a tech entrepreneur, author and professor at New York University's Stern School. In brisk prose and catchy illustrations, he vividly demonstrates how the largest technology companies turned the crisis of the pandemic into the market-share-grabbing opportunity of a lifetime." --The New York Times "As good an analysis as you could wish to read." --The Financial Times From bestselling author and NYU Business School professor Scott Galloway comes a keenly insightful, urgent analysis of who stands to win and who's at risk to lose in a post-pandemic world The COVID-19 outbreak has turned bedrooms into offices, pitted young against old, and widened the gaps between rich and poor, red and blue, the mask wearers and the mask haters. Some businesses--like home exercise company Peloton, video conference software maker Zoom, and Amazon--woke up to find themselves crushed under an avalanche of consumer demand. Others--like the restaurant, travel, hospitality, and live entertainment industries--scrambled to escape obliteration. But as New York Times bestselling author Scott Galloway argues, the pandemic has not been a change agent so much as an accelerant of trends already well underway. In Post Corona, he outlines the contours of the crisis and the opportunities that lie ahead. Some businesses, like the powerful tech monopolies, will thrive as a result of the disruption. Other industries, like higher education, will struggle to maintain a value proposition that no longer makes sense when we can't stand shoulder to shoulder. And the pandemic has accelerated deeper trends in government and society, exposing a widening gap between our vision of America as a land of opportunity, and the troubling realities of our declining wellbeing. Combining his signature humor and brash style with sharp business insights and the occasional dose of righteous anger, Galloway offers both warning and hope in equal measure. As he writes, "Our commonwealth didn't just

happen, it was shaped. We chose this path--no trend is permanent and can't be made worse or corrected."

Atlas of Submarine Glacial Landforms May 24 2020 New geophysical techniques (multibeam echo sounding and 3D seismics) have revolutionized high-resolution imaging of the modern seafloor and palaeo-shelf surfaces in Arctic and Antarctic waters, generating vast quantities of data and novel insights into sedimentary architecture and past environmental conditions. The Atlas of Submarine Glacial Landforms is a comprehensive and timely summary of the current state of knowledge of these high-latitude glacier-influenced systems. The Atlas presents over 180 contributions describing, illustrating and discussing the full variability of landforms found on the high-latitude glacier-influenced seafloor, from fjords and continental shelves to the continental slope, rise and deep-sea basins beyond. The distribution and geometry of these submarine landforms provide key information on past ice-sheet extent and the direction and nature of ice flow and dynamics. The papers discuss individual seafloor landforms, landform assemblages and entire landsystems from relatively mild to extreme glacial marine climatic settings and on timescales from the modern margins of tidewater glaciers, through Quaternary examples to ancient glaciations in the Late Ordovician.

Squid Cinema From Hell Jun 05 2021 Here be Kraken! The Squid Cinema From Hell draws upon writers like Vilem Flusser, Donna J. Haraway, Graham Harman and Eugene Thacker to offer up a critical analysis of cephalopods and other tentacular creatures in contemporary media, while also speculating that digital media might themselves constitute a weird, intelligent alien. If this were not enough to shiver ye timbers, the book engages with contemporary discourses of posthumanism, speculative realism, object-oriented ontology and animal studies to suggest that humans are the products of media rather than media being the products of humans. Including case studies of films by Denis Villeneuve, Park Chan-wook and Celine Sciamma, The Squid Cinema From Hell also provides a daring engagement with various media beyond cinema, including literature, music videos, 4DX, advertising, websites, YouTube, Artificial Intelligence and more. Zounds! This unique and Lovecraftian book will change the way you think about, and with, our contemporary, media-saturated world. For as we contemplate the abyss, the abyss looks back at us - and chthulumedias, or media at the end of human times, begin to emerge.
