Like American politics, the academic debate over justice is polarized, with almost all theories of justice falling within one of two traditions: egalitarianism and libertarianism. This book provides an alternative to the partisan standoff by focusing not on equality or liberty, but on the idea that we should give people the things that they deserve. Mulligan sets forth a theory of economic justice—meritocracy—which rests upon a desert principle and is distinctive from existing work in two ways. First, meritocracy is grounded in empirical research on how human beings think, intuitively, about justice. Research in social psychology and experimental economics reveals that people simply don't think that social goods should be distributed equally, nor do they dismiss the idea of social justice. Across ideological and cultural lines, people believe that rewards should reflect merit. Second, the book discusses hot-button political issues and makes concrete policy recommendations. These issues include anti-meritocratic bias against women and racial minorities and the United States' widening economic inequality. *Justice and the Meritocratic State* offers a new theory of justice and provides solutions to our most vexing social and economic problems. It will be of keen interest to philosophers, economists, and political theorists. Interpersonal relationships are the core of our societal system and have been since before the dawn of civilization. In today's world, friends, lovers, companions, and confidants make valuable contributions to our everyday lives. These are the relationships whose members are not automatically participants as a result of their birth and kin affiliations. The focus is on

these relationships that must be forged from the sometimes indifferent, and sometimes hostile world. Yet, there is still much that is not known about how these relationships evolve, how partners communicate in on-going relationships, how people keep their relationships together, and how they cope when they fall apart. Primary to the focus of this book is the underlying theme of evolving interpersonal relationships from the initial encounter to the mature alliance. The contributors to this volume provide a contemporary perspective for the study of interpersonal relationships. Fresh areas of scholarly inquiry are presented and existing approaches are re-examined. Research in the introductory chapters breaks new ground, and appraises the ultimate question of what impact initial interactions have on further relational development. The mid-section of the volume concerns communication issues that confront the members of a relationship in process, focusing on how conflict and jealousy are communicated to a relational partner. This research considers relational development as well as obstacles and barriers to evolving relationships. The concluding chapters probe the question: Ultimately do all good things have to come to an end? Employing innovative techniques to examine maturing and disengaging relationships, the research presented here focuses on how interpersonal relationships become committed and mature. The political transformation that took place at the end of the Roman Republic was a particularly rich area for analysis by the era's historians. Major narrators chronicled the crisis that saw the end of the Roman Republic and the changes that gave birth to a new political system. These writers drew significantly on the Roman idea of *virtus* as a way of interpreting and understanding their past. Tracing how *virtus* informed Roman thought over time, Catalina Balmaceda explores the concept and its manifestations in the narratives of four successive Latin historians who span the late Republic and early Principate: Sallust, Livy, Velleius, and Tacitus. Balmaceda demonstrates that *virtus* in these historical narratives served as a form of self-definition that fostered and propagated a new model of the ideal Roman more fitting to imperial times. As a crucial moral and political concept, *virtus* worked as a key idea in the complex system of Roman sociocultural values and norms that underpinned Roman attitudes about both present and past. This book offers a reappraisal of the historians as promoters of change and continuity in the political culture of both the Republic and the Empire.

Tuberculosis ran rampant in Japan during the late Meiji and Taisho years (1880s–1920s). Many of the victims of the then incurable disease were young female workers from the rural areas, who were trying to support their families by working in the new textile factories. The Japanese government of the time, however, seemed unprepared to tackle the epidemic. Elisheva A. Perelman argues that pragmatism and utilitarianism dominated the thinking of the administration, which saw little point in providing health services to a group of politically insignificant patients. This created a space for American evangelical organizations to offer their services. Perelman sees the relationship between the Japanese government and the evangelists as one of moral entrepreneurship on both sides. All the parties involved were trying to occupy the moral high ground. In the end, an uneasy but mutually beneficial arrangement was reached: the government accepted the evangelists' assistance in providing relief to some tuberculosis patients, and the evangelists gained an opportunity to spread Christianity further in the country. Nonetheless, the patients remained a marginalized group as they possessed little agency over how they were treated. "Perelman captures the strategies that enabled Protestant missionaries to become a central force in treating tuberculosis and providing social services in prewar Japan. Acting as 'moral entrepreneurs,' the medical missionaries deftly raised funds abroad, gained support from the Japanese state, gained converts, and cultivated a corps of Japanese medical practitioners."

—Sheldon Garon, Princeton University; author of *Molding Japanese Minds: The State in Everyday Life* "Based on a wide range of primary and secondary sources, this groundbreaking

book traces evangelical Christianity and the work of medical missions in late nineteenth- and early twentieth-century Japan. It is a must-read for anyone interested in the history of Christianity, disease, medicine, or public health in modern Japan.” —William Johnston, Wesleyan University; author of *The Modern Epidemic: A History of Tuberculosis in Japan*

Creating abundance and a thriving local economy through community-scale enterprise Tiptree burst onto the science fiction scene in the 1970s with hard-edged, provocative short stories. Then the cover was blown: the author was actually a 61-year-old woman named Alice Sheldon--world traveler, debutante, chicken farmer, CIA agent, and experimental psychologist. This inquiry into the collective psychology of the ancient Romans speaks not about military conquest, sober law, and practical politics, but about extremes of despair, desire, and envy. Carlin Barton makes us uncomfortably familiar with a society struggling at or beyond the limits of human endurance. To probe the tensions of the Roman world in the period from the first century b.c.e. through the first two centuries c.e., Barton picks two images: the gladiator and the "monster." Clinical psychoanalysis serves as our best laboratory for exploring the riddle of what it is to be a person, and how a person is at once singularly unique while always a piece of the interpersonal fabric of humanity. In *Intimacy and Separateness in Psychoanalysis*, Warren Poland casts a freshly erudite eye on this paradox, resisting individual or intersubjective bias and avoiding the parochial allegiances common in our age of pluralism. Poland combines vivid reports from clinical analyses, literary readings, and his own life – all unfolding original observations on a person as both a part of and apart from human commonality. His consideration of how one person’s witnessing facilitates another’s self-definition, a concept extended here in his study of outsidership as part of human nature, has been marked a keynote contribution. Clinical illustrations of moments that matter but are usually omitted from public presentation are set alongside examples of reading powerful fiction to show how analyst and author both incite fresh openness in a person’s mind. Poland goes farther, exposing the personal power of union and separateness in its keenest form, facing the ultimate separation of one’s own actual death. Only with separateness can true intimacy grow, and only within the fabric of others can true individuality exist. This evocative book, ranging from the lightness of whimsy to the dread of dying, allows every reader to taste of and learn from Poland’s thinking. Psychoanalyst or patient, writer or reader, each one living one’s own life – all can find new understandings in this work.

Focuses on nonverbal messages and their role in close relationships - friends, family, and romantic partners. This book takes a functional perspective in its examination of how nonverbal messages work to signal affection, romantic interest, sexual attraction, dominance, and other roles. *Gender: Psychological Perspectives* synthesizes the latest research on gender to help students think critically about the differences between research findings and stereotypes, provoking them to examine and revise their own preconceptions. The three moments are early Christian history (for forgiveness), the shift from British eighteenth-century to Continental nineteenth-century philosophers (for resentment), and the moment in the 1950s postwar world in which British ordinary language philosophers and American sociologists of everyday life theorized what it means to express or perform an apology. The debates that arose in those key moments have largely defined our contemporary study of these practices. The bicycle has long been a part of American culture but few would describe it as an essential element of American identity in the same way that it is fundamental to European and Asian cultures. Instead, American culture has had a more turbulent relationship with the bicycle. First introduced in the United States in the 1830s, the bicycle reached its height of popularity in the 1890s as it evolved to become a popular form of locomotion for adults. Two decades later, ridership in the United States collapsed. As automobile consumption grew, bicycles were seen as backward and unbecoming—particularly for the white middle class. Turpin chronicles the story of how the bicycle's image changed dramatically, shedding light on how American consumer patterns are shaped over time. Turpin identifies the creation and development of childhood consumerism as a key factor in the bicycle's evolution. In an attempt to resurrect dwindling sales, sports marketers reimagined the bicycle as a child's toy. By the 1950s, it had been firmly established as a symbol of boyhood adolescence, further accelerating the declining number of adult consumers. Tracing the ways in which cycling suffered such a loss in popularity among adults is fundamental to understanding why the United States would be considered a "car" culture from the 1950s to today. As a lens for viewing American history, the story of the bicycle deepens our understanding of our national culture and the forces that influence it. This book is an in-depth exploration of ENVY/Developer, IBM's team programming environment for Smalltalk and Java. Written by well-known experts in the area, it presents both introductory and advanced topics with detailed examples. The first two parts of the book introduce the basics that a developer or development manager must know in order to use ENVY in a project setting, including the development process and the organization of applications. The third part covers advanced programming and customization, including detailed information on administering, troubleshooting, and extending the tools. This book covers VisualAge for Smalltalk, VisualWorks, and VisualAge Generator in detail. In addition, the concepts and management presented within the book apply to VisualAge for Java. Code examples, tools, and add-ons, are available on the supporting Web site. Vols. for 1921-1969 include annual bibliography, called 1921-1955, American bibliography; 1956-1963, Annual bibliography; 1964-1968, MLA international bibliography. *Foundation Sacrifice in Dante's "Commedia"* is the first book to take an anthropological approach to the Divine Comedy, applying it to a previously unexplored dimension of Dante's great poem. Ricardo Quinones examines foundation sacrifice&—the death of another that has become a parable for

existence&—as a unifying theme that connects the three parts of the poem. In the process, Quinones gives new life to the Purgatorio, treating it not only as a sequel but actually as a dramatic response&—in revealing detail&—to the Inferno. His motif allows him to reintegrate the Paradiso into the poem as a whole, thus restoring it as a poetic event to critical appreciation.
