[The Electric Pencil](#) Feb 04 2021 Deeds's subtle, meticulous, and wildly imaginative pencil and crayon drawings portray an unusual cast of characters: nineteenth-century dandies, Civil War soldiers, antique cars, fantastic boats and trains, country landscapes dotted with roaming animals, and fanciful architecture. None of these existed in the actual mid-twentieth-century landscape of Deeds's own life, but rather were representations of his inner world—an artist's poignant tribute to a faded past. Deeds lovingly bound his artwork in a cardboard and leather portfolio, a present for his mother. After being accidentally discarded in 1970, the album was rescued from the trash by a young boy and, thirty-six years later, came into the hands of artist and collector Harris Diamant, who provides the book's foreword. The Electric Pencil features all 283 of Deeds's arresting drawings—now avidly collected—done on ledger sheets from State Hospital No. 3 in Nevada, Missouri, and reproduced in the sequence of the original album. The Electric Pencil introduces readers to an astonishing record of one man's unwavering artistic vision in the face of the most inhospitable conditions.

**M. A. S. H. Fortune Teller** Dec 22 2019 M.A.S.H. Fortune Teller is the classic paper and pencil game that predicts your future. Will you live in a mansion? Have a famous spouse? Go on a marvelous vacation? Play to find out! How to Play First, the player works through the categories and writes down four options for each. For each category, they should pick two dream examples of the category. For example, their dream spouses may be a famous movie star and pro athlete. They should also pick two nightmare spouses, like a famous dictator and a book villain. Once all the categories are filled with four options, the player draws a quick spiral in the spiral space until someone tells them to stop (if you're playing alone, just draw with your eyes closed and stop randomly). Starting at the top of your spiral and working down, count how many lines there are in your spiral. That's your magic number! Write it in. Now, start on the word 'Mansion' and count to your magic number. Count the words, 'Mansion, Apartment, Shack, House' separately and then count each of the options. So if your magic number is 6, your finger will land on the second 'Spouse' option. Draw a line through the option your finger landed on. Now keep counting to 6, crossing out the sixth option each time. The next option to cross out for 6 would be the fourth job option and so on. Continue counting until you have eliminated all but one option in every category. Enjoy reading your fortune! This book has 100 chances to play.

Exploring Students' Writing on a Computer Versus Paper and Pencil Feb 22 2020 This study examined how writing scores and experiences compared for upper-elementary students who composed text via Google Docs versus traditional writing with paper and pencil. The fifth-grade participants in this study completed a three week writing unit and produced a multi-paragraph opinion essay that was assessed. Participants then took part in a post survey to share their experiences, successes, and challenges in writing with their assigned writing medium. The treatment group had a nominally higher overall mean score than the control group, with writing performance scores looking similar across both groups. Data from the survey responses revealed that the treatment group edited their writing more often than the control group and that they had higher levels of engagement and more positive attitudes in writing than the control group. However, the control group revised their writing more often than the treatment group. Themes from the open-ended responses centered around the ideas of distractions, neatness, and spelling, with students citing pros and cons for both writing with paper and pencil and a computer. It's also important to note that regardless of the method students used to compose text, their writing preferences played a role in their writing experience.

*Asteroid Vs Dinosaur* Aug 10 2021 Asteroid vs Dinosaur is a strategy guessing game for two players. Try to blast your opponents prehistoric dinosaurs by guessing where they might be on the grid. To avoid being hit by the your opponents asteroids you must devise a strategy to hide your dinosaurs in safe areas, that's how your dinosaurs survive and win playing Asteroid vs Dinosaur. This Game is for any occasion: Vacation, school vacation days, weekends when there is nothing to do (Mom I'm bored!), rainy days, snowy days, road trips, play days, sleepovers and when relatives visit and even more! All you need is this book (or two) and a pencil or pen. This fun activity book makes a great prize for birthday parties, an activity for holidays get together or the long trips by car or plane to vacation destinations (are we there yet?). This book is 120 pages, matte finish soft-cover, 8.5 inches x 11 inches, includes ownership page, instruction page and game pages. (Be sure to click on 'Look Inside' link upper left corner of the product page). Instructions: To play Asteroid vs Dinosaur, you and your opponent will each need one page of the book. Before play begins, secretly arrange your 'Dinosaurs' on your board by drawing rectangles around the squares they occupy. A Tyrannosaurus Rex for example will be one rectangle that surrounds five squares in a row. Each player has one Tyrannosaurus Rex, one Brachiosaurus, one Triceratops, two Spinosaurus and three Stegosaurus (which each occupy just one square each). Once both players have drawn their Dinosaurs on the board, play begins. The first player will call a grid square, for example, "B3". Their opponent will answer 'Hit' or 'Miss'. If they 'hit' their opponent's Dinosaur, they mark that square with a circle on the opponent board and make another guess. Guesses continue until they 'miss'. Misses should be marked with a cross on the opponent board. Once the player misses, it is the opponent's turn to guess. Play continues until one player hits all of his opponents Dinosaurs. Asteroid variation: Advanced players may fire an agreed amount of multiple asteroids (guesses) at a time and may answer like this, "Three hits and two

misses" so their opponent must deduce which shots were successful.
