The fifth edition of Business Ethics addresses current, intriguing, often complex issues in corporate morality through 53 readings and 30 pertinent case studies. Now significantly updated, it includes new leading articles, related current cases, and mini-cases based on MBA student dilemmas. Addresses a broad range of the most current, intriguing, often complex issues and cases in corporate morality Provides impartial, point-counterpoint presentations of different

perspectives on the most important and highly contended issues of business ethics Updated and significant case studies are included to reinforce student learning Now contains mini-cases based on actual MBA student dilemmas Each author has substantial experience in teaching, writing, and conducting research in the field The book provides a comprehensive look at emerging technological trends in the workplace. Technological issues and trends are compiled from different venues and explored from management, HR, ethical, and organizational behavior viewpoints. Electronic business plays a central role in the economy, facilitating the exchange of information, goods, services, and payments. It propels productivity and competitiveness and is accessible to all enterprises, and as such, represents an opportunity also for SME competitiveness. E-Business Issues, Challenges and Opportunities for SMEs: Driving Competitiveness discusses the main issues, challenges, opportunities, and solutions related to electronic business adoption, with a special focus on SMEs. Addressing technological, organizational, and legal perspectives in a very comprehensive way, this text aims to disseminate current developments, case studies,

new integrated approaches, and practical solutions and applications for SMEs. This is a unique book that not only discusses the principal state and federal environmental regulatory programs affecting business and commercial transactions, but also offers practical guidance on the impact of these complex requirements from the unique viewpoint of a transactional lawyer. The chapters have been written by seasoned environmental lawyers with extensive transactional experience. Resolving Moral Issues in Business. The ethical landscape of business is constantly changing, and the new edition of Business Ethics: Concepts and Cases has been revised to keep pace with those changes most effecting business: accelerating globalization, constant technological updates, proliferating of business scandals. Business Ethics: Concepts and Cases introduces the reader to the ethical concepts that are relevant to resolving moral issues in business; imparts the reasoning and analytical skills needed to apply ethical concepts to business decisions; identifies moral issues specific to a business; provides an understanding of the social, technological, and natural environments within which moral issues in business arise; and supplies case studies of actual moral conflicts faced by businesses. Peg Tittle's ambitious business ethics text brings together readings, cases, and the author's own informed opinions. The second

edition includes over a dozen new readings and case studies, as well as a new chapter on issues in Information and Communication Technology. Includes - Canonical and topical readings on issues ranging from whistleblowing and advertising to international business, the nature of capitalism, and the environment - Engaging overviews from the author encourage careful reflection and critical examination of conventional assumptions - What to Do? scenarios and Case Studies illustrate the practical relevance of each topic - Comprehensive introductions to ethical theory and the ethics of business - Questions following each selection test understanding and promote active reading - A primer on ethical institutions examines the role of ethics consultants, codes of ethics, and more Measuring Entrepreneurial Businesses: Current Knowledge and Challenges brings together and unprecedented group of economists, data providers, and data analysts to discuss research on the state of entrepreneurship and to address the challenges in understanding this dynamic part of the economy. Each chapter addresses the challenges of measuring entrepreneurship and how entrepreneurial firms contribute to economies and standards of living. The book also investigates heterogeneity in entrepreneurs, challenges experienced by entrepreneurs over time, and how much less we know than we think about

entrepreneurship given data limitations. This volume will be a groundbreaking first serious look into entrepreneurship in the NBER's Income and Wealth series. The only book with a 'themes and issues' approach that encourages critical engagement with contemporary debates in the business environment. This volume presents current research on gender studies in the specific context of the knowledge economy. Featuring contributions from the 2017 Annual Ipazia, the Scientific Observatory for Gender Studies Workshop on Gender, this book investigates gender issues and female entrepreneurship from social, economic, corporate, organizational, and management perspectives, with particular emphasis on advancing the understanding of gender in business and economic research. The post-industrial knowledge economy is characterized by an emphasis on human capital as the real engine of sustainable growth and development. With women comprising an increasing share of the global workforce, gender studies play a central role in exploring and understanding the attitudes and skills of women in business and their impact on economic and social development. Gender inequality in public and private contexts is decreasing due to an increase of women in leadership roles in business, the expansion and diversity of females in education, and a larger presence of women in policymaking roles. Ipazia, the Scientific Observatory for Gender Studies, aims to define

an updated framework of research, service and projects on women and gender relations to highlight the evolution of gender in business and economics. This volume features contributions on female-owned family business, gender diversity in organizations, gender capital, and immigration from the 2017 Ipazia workshop. Business ethics is a form of the art of applied ethics that examines ethical rules and principles within a commercial context, the various moral or ethical problems that can arise in a business setting, and any special duties or obligations that apply to persons who are engaged in commerce. Business ethics can be both a normative and a descriptive discipline. As a corporate practice and a career specialisation, the field is primarily normative. In academia descriptive approaches are also taken. The range and quantity of business ethical issues reflects the degree to which business is perceived to be at odds with non-economic social values. Historically, interest in business ethics accelerated dramatically during the 1980s and 1990s, both within major corporations and within academia. For example, today most major corporate websites lay emphasis on commitment to promoting non-economic social values under a variety of headings (e.g. ethics codes, social responsibility charters). In some cases, corporations have redefined their core values in the light of business ethical considerations.

Catching business ethics in action, however, remains a seldom-spotted nugget for in reality it depends on the characters of the characters. Current Issues in Business Ethics analyzes the questions which underlie business activities, arguing that the prime object for a legitimate business must be sustainability. It also looks at the issues between individuals and business and asks whether businesses can support their employees as an alternative to family and church. Finally it assesses the impact of most recent trends in business looking at: * the activities of multinational companies * the changing gender balance * privatization * the loss of power of the trade unions. This book is a collection of high-impact papers accepted and presented at the 2019 Vietnam's Business and Economics Research Conference (VBER2019) organised by Ho Chi Minh City Open University held on 18th-20th July 2019. The Special Issue is associated with a broad coverage of the contemporary issues in Business and Economics in Vietnam and other emerging markets reflecting a key theme of VBER2019: Vietnam's Place in the Asia Pacific Region. A total of 14 papers were published from more than the 120 submissions to the VBER2019 Conference. Published papers had been undergone a rigorous reviewing process conducted by the Journal of Risk and Financial Management. The papers incorporated in this book address contemporary

issues in business and economics from Vietnam and other emerging markets in the Asian region from various angles such as economics, finance, and statistics to management science. At the time of writing this note, some of the papers have attracted more than 1000 downloads in 3 months. In particular, a paper on "Foreign Direct Investment and Economic Growth from Developing Countries in the Short Run and Long Run" by Trang Thi-Huyen Dinh and her team has attracted almost 6000 downloads in 3 months. These statistics indicate that the papers published in this Special Issue have attracted the wide interest of readers. Among these 14 published papers, three main areas of important contemporary issues in Business and Economics in the Asian region can be identified. First, a block of papers deals with various important and fundamental issues in the emerging markets the Asian region, from exchange rate regime, financial inclusion, and financial development to energy consumption and environmental degradation. On the issue of CO2 emissions, energy consumption and economic growth in the ASEAN, Vo, Vo, and Le utilized various time series econometrics approaches. Key findings from this paper indicate that there are no long-run relationships among carbon dioxide (CO2) emissions, energy consumption, renewable energy, population growth, and economic growth in the

Philippines and Thailand, but a relationship does exist in Indonesia, Myanmar, and Malaysia. Loo, in his paper on financial inclusion for the ASEAN, concluded that advancing internet capability and availability present investors an opportunity to offer financial technology or Fintech to meet the need for financial services in this digital era. Second, a challenge in quantitative studies for a single country, such as Vietnam, with limited data is generally noted. However, various empirical studies on Vietnam's business and economics issues have been conducted. Nguyen, Quan, and Pham examined the cultural distance and entry mode of foreign direct investment in Vietnam. A key finding from their paper is that when there is a great cultural difference between Vietnam and their home country, foreign-invested firms prefer wholly owned subsidiaries over equity joint ventures. Within the Vietnamese market, Pham, Vo, Ho, and McAleer conducted a study on the issue of corporate financial distress. The authors conclude that the corporate financial distress prediction model, which includes accounting factors with macroeconomic indicators, performs much better than alternative models. In addition, the evidence confirms that the global financial crisis (GFC) had a damaging impact on each sector, with the Health & Education sector demonstrating the most impressive recovery post-GFC, and the utilities sector

recording a dramatic increase in bankruptcies post-GFC. At another extreme of the spectrum, Van and Nguyen considered that competitive context, social influences, the understanding of managers about corporate social responsibility (CSR), and the internal environment of companies are the four drivers of CSR. The authors also argued that in the four drivers, competitive context has the strongest impact on adopting CSR. Third, last but not least, various papers focus on an important aspect of public finance. For an example, Pham, Pham, and Ly documented the effect of double taxation treaties on the bilateral trade of Vietnam with ASEAN member states, thereby making an extensive comparison with its EU partner countries. Their findings indicate the significant contributions of the tax treaties to Vietnam's trade performance, not exclusively with ASEAN but also with EU partner countries. In addition, regarding public finance for Vietnam, Nguyen, Vo, Ho, and Vo investigated the contribution of fiscal decentralisation to economic growth across provinces in Vietnam. For the first time in Vietnam, the fiscal decentralisation index together its two subcomponents, including fiscal importance and fiscal autonomy, are developed. Findings from this paper indicate that while fiscal importance and an overall level of fiscal decentralisation have provided negative impact on provincial economic growth, fiscal autonomy has a positive

impact on economic growth across provinces in Vietnam. Business and Development Studies: Issues and Perspectives provides a comprehensive collection of cutting-edge theoretical and empirical contributions to the emerging field of business and development studies. Compared to more traditional business-school accounts of business in developing countries which focus on the challenges and opportunities of doing business in developing countries, this anthology explores whether, how, and under what conditions business contributes to the achievement of economic, social, and environmental goals in developing countries. The book consolidates the current status of academic work on business and development, identifies state of the art in relation to this academic field, and establishes a future research agenda for 'business and development studies' as an emerging academic discipline within the social sciences. The book will be of interest to researchers and students, including economists, geographers, sociologists, political scientists, corporate social responsibility specialists, and development scholars who are seeking an in-depth overview of current debates about the role of business as a development agent in the Global South. The book is also of relevance to practitioners that are engaged in work with the private sector seeking to enhance the positive effects and minimize the negative economic, social, and

environmental consequences of business activity in the Global South. This book examines the financial crisis and the effect it has had in the global business, finance and economic sectors. Topics discussed include the causes of the financial crisis; the elements needed for the management of a business corporation crisis; global operations management; an analysis of the public debt; the history and recent increases in the debt limit and the various issues and policies surrounding the economic stimulus. Issues in Business Ethics and Corporate Social Responsibility explores these foundational themes across a wide range of topics, including artificial intelligence, workplace surveillance, supply chain management, big data, the finance industry, and many more. Coupled with a broad introduction by Dr. David Weitzner, a professor of management at York University, this book provides students with the essential information they need to assess business practices through the lens of ethical decision-making and corporate social responsibility. This book illustrates the impact of increasingly prominent global phenomena, such as digitalisation and climate change, on the international activities of both small and large multinationals. As it highlights, extant management research does not fully explain such emergent topics as Internet platforms, digital business models, and the decision-making of cleantech and circular economy

companies. This volume serves to fill this lacuna. The core of this text comprises chapters on all the key issues of business in Canada today. Each chapter includes a hypothetical case study and an introduction highlighting key ethical points; two academic essays; and a real-life case study. Questions for discussion accompany the essays and case studies. The author has also included a general introduction to ethical issues and an overview of ethical theory; a section on institutionalizing ethics (discussing ethics officers/programs/codes etc.); and appendices providing excerpts from important classic contributions to ethical theory and from relevant Canadian law. Contemporary Studies in Economic and Financial Analysis (CSEF 104) dedicates 16 chapters in articles and studies on Contemporary Issues of Business Economics and Finance. Authors contributed from the International Applied Social Science Congress, held in Turkey. MORAL ISSUES IN BUSINESS, 13E examines the moral dilemmas that are common to today's business climate and gives readers the analytical tools to resolve those issues. Using a combination of true stories, interesting reading selections, and a conversational writing style, this edition prepares readers for the moral quandaries awaiting them in the professional world. Featured topics include: the nature of morality, individual integrity and responsibility, economic justice, pitfalls of capitalism,

and corporations' responsibilities to consumers and the environment. Plus, this edition also discusses situation-specific concepts such as downsizing, whistle blowing, sexual harassment, job discrimination, animal abuse, and drug testing. Research Methodology remains a vital issue at the heart of all scholarly activity. Without a proper appreciation of Research Methodology and its correct application academic progress is not possible. One of the problems which Research Methodology offers the learner is the very wide range of options which are frequently available with which to answer a research question and this high level of choice can lead to indecision and sometimes confusion. This book is a compilation of a number of important papers on this subject selected by two leaders in this field of study. A wide range of topic have been chosen which lead the reader through some of the more important considerations in the field. The book is designed to help with this type of problem and the the current selection of papers which highlight a variety of research questions, problems and issues and an accompanying range of research methods and methodological discussions. Their authors have stated the research positions they have adopted and respective levels of justification and knowledge

forms have been presented. These range from those forms of knowledge that might be found of use to practitioners to those that are more philosophically or academically inclined. A certain level of research impact is either implied or overtly presented in the selected papers. This book is an important text for academics, researchers and students as well as those interested in using research from a commercial point of view. If today's business schools are to fulfill their obligation to produce the managers of the future, academic training has to include environmental awareness. This book provides a better understanding of the dramatic implications that environmental concerns are having on the practice of business and on the teaching of business practices. It creates and enhances environmental awareness, fostering creative thinking in a manner consistent with the objectives of business schools. Environmental Issues in the Curricula of International Business discusses the necessity and criticality of environmental awareness to business practices in the 1990s and beyond, drawing a link between this information and its application to business curricula. Chapters discuss the many implications of the Green movement and increased environmental concerns on international business and how this affects the obligations of business educators. Additional chapters focus on environmental ethics and

responsibilities. Some specific topics covered include: the effects of the green challenge to business schools in the light of the environmental needs of business organizations the impact of an ecological approach to the development of a sustainable economy a description of six potential avenues for academic business involvement in environmental business teaching, research, and service curriculum development incorporating the theme of environmental ethics in international business education a contrasting look at two models for including environmental ethics in the international business curricula This groundbreaking book emphasizes the responsibilities of educators and researchers for the inclusion of environmental consciousness in the present curriculum in business schools. Marketing and management academics, professionals specializing in the environment and ethics, and business school deans and university presidents will find this book a vital tool for incorporating environmental concerns into their curricula. Paul M. Minus Overview The papers gathered in this volume were first presented for reflection and discussion at a landmark event in March 1992. The International Conference on the Ethics of Business in a Global Economy, held in Columbus, Ohio, brought together over 300 participants from twenty-two nations in six continents. This was the most geographically diverse body of leaders ever assembled to consider issues of ethics in

business. Approximately two-thirds of them were business executives; the others came mainly from the fields of education and religion. Knowing the context from which this book emerged will help readers understand its composition and content. As can be quickly seen, the fourteen authors who have contributed to it come from different areas of the world and from different fields of endeavor. One finds, first, essays on the book's central theme by business leaders from four nations. Next there are analyses of three key topics by scholars active in the fields of economics and ethics. Then come statements by practitioners of four major world religions on the relevance of their respective traditions to the ethics of business. Finally there are six brief case studies prepared by two business ethicists about specific ethical issues arising in international business. The authors address different facets of one of the most dramatic new facts of our time: the globalization of business. With many corporations now operating around the world and others planning a significant expansion of markets, this development is destined to accelerate in coming decades. Published by Academic-Publishing International in 2011. This is a collection of 11 important Research Methodology Papers which will be of particular value to those who have a dissertation to write be it for an undergraduate degree, for a masters or even a doctorate. In

addition the book has much to offer academic supervisors. The papers here are reproduced from those published in the Electronic Journal of Business Research Methods (www.ejbrm.com). This book has papers presented in ICCBP 2021 in the area of Marketing, Finance and Accounting, OB and HRM, Operations and SCM, IT, Strategy, Entrepreneurship and case studies with respect to various functional activities. The book will find some space in the minds of the stakeholders and provide some important strategies for the future. CONTEMPORARY ISSUES IN BUSINESS ETHICS, 6E introduces readers to business ethics by focusing on the influence of market mechanisms and social values on workplace norms. And because business is increasingly a global enterprise, this edition emphasizes the role of ethics both at home and abroad. CONTEMPORARY ISSUES IN BUSINESS ETHICS, 6E also takes time to look at ethics from the unique perspectives of either employee or employer. Along the way, readers also learn about such topics as ethical relativism, ethics and the law, virtue ethics, and ethical decision-making. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. A comprehensive overview of current issues in business and society. The selections include essays on international business and society as well as

studies focusing on the USA. With new introductions, cases, and readings, this edition presents ethical insights and thinking with respect to events in American and international businesses. In 2020, COVID-19 starkly demonstrated the global interconnectedness of business, as it disrupted supply chains and manufacturing operations, broadly shuttered retail stores, and led to restrictions on movement and travel around the world. Other events in 2019 also showcased the undeniable globalization of business, be it from the (un)expected ramifications of Brexit to the impacts of data breaches across various industries. Riots in Hong Kong over an extradition bill also sparked huge debate and controversy, and the U.S.-China trade war also caused concern. All of these events may have largely and immediately impacted one region, yet effects reverberate across larger swathes of the globe—ultimately affecting vast areas, industries, and sectors across the international landscape. Issues in Global Business explores all of these and more, across a wide range of topics, including the on-demand economy, global manufacturing, Bitcoin, data security, and many more. Coupled with a comprehensive overview of the business landscape around the world by Dr. Mamoun Benmamoun, an assistant professor at the Boeing Institute of International Business at Saint Louis University, this book provides students with the essential information they need

to assess business practices through an international lens. "This book provides a comprehensive overview of the most important ethical issues associated with the expanding world of e-business, and offers relevant theoretical frameworks to ethical issues in all significant areas of e-business"--Provided by publisher. "This book explores the social implications and challenges of E-Business and E-Commerce regarding social inclusion and exclusion, the social shaping of e-business technologies, the changing nature and patterns of work and social activities, and online identity, security, risks, trust and privacy. It also explores the applications of E-Business technologies and principles in non-business activities and the challenges involved"--Provided by publisher.
